Sic Bo

# sic bo

**Sic Bo** is an ancient Chinese game played with three dice. The object of the game is to predict which numbers will appear on the dice once they are shaken. Bets range from a specific triple with payout odds of 180 to 1, to betting on the value of one of the dice with payout odds of 1 to 1.

## how to play

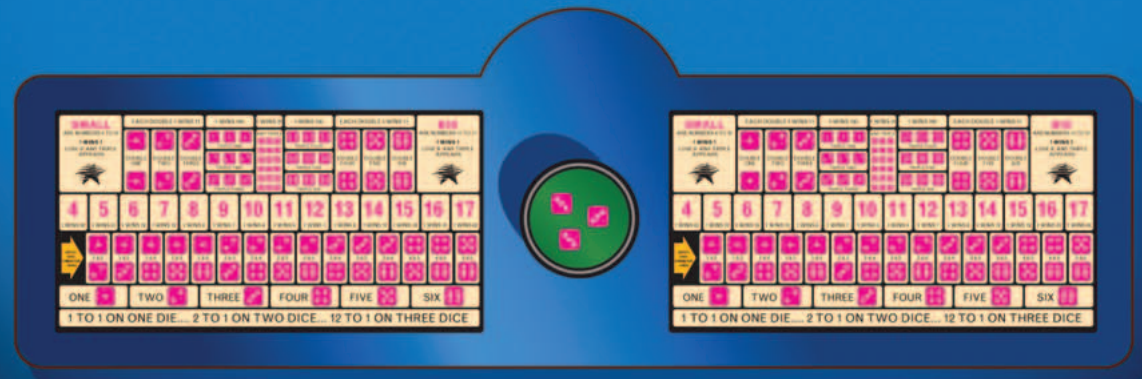

To make a bet on Sic Bo, place your chips on the appropriate area of the table. Neither verbal nor cash bets will be accepted. You are responsible for the positioning of your own bets regardless of any assistance from the dealer.

The dealer covers the dome and tumbles the dice. The dealer then announces, "Place your bets." Once the bets are placed, the dealer announces, "No more bets" and lifts the dome cover to reveal the winning combination. The numeric value of each dice is then entered into a keypad and all winning combinations are lit up on the Sic Bo layout.

The dealer then removes losing bets from the table and pays winning bets.
